

JAMES J. WEISMAN
Professional Engineer

Education and Professional Registration

Texas A&I University
B.S. Petroleum and Natural Gas Engineering
Professional Engineer (Texas): Texas PE License #59495

Present Position Responsibilities

As a professional engineering consultant for the last seven years with EE&G, Mr. Weisman is responsible for review and design assistance for EE&G projects related to process engineering applications (groundwater/wastewater treatment systems, catalytic oxidation systems, soil remediation systems, etc.), spill prevention, control and countermeasure (SPCC) planning, storm water pollution prevention planning (SWPPP), air permitting and other facility related permitting projects.

Technical Expertise

Mr. Weisman has a broad base of technical expertise in the fields of engineering design, facility planning and permitting. His technical specialty lies in the formulation, development, design and implementation of suitable SPCC plans, having prepared more than 200 SPCC plans for approximately 15 different clients since 1986 in association with personnel training on the plan implementation. Mr. Weisman has also prepared SWPPP plans for a variety of public and private sector clients. In addition, Mr. Weisman is technically adept in the design criteria associated with remedial system design, implementation and operations. Mr. Weisman has provided professional engineering, permitting and design services at numerous commercial, industrial and municipal sites for both public and private sector clients throughout a multi-state area in the south central United States.

Client Markets

Clients from whom Mr. Weisman has provided services represent a diverse group of private businesses, municipalities and other public sector entities. Some of the client markets with which he has significant experience include:

- | | | |
|-----------------------|--------------------------|-----------------------|
| * Airlines | * Automotive | * Bus Lines |
| * Chemical Processing | * Construction | * Petroleum Marketing |
| * Federal Agencies | * Local Government | * Manufacturing |
| * Railroads | * Petroleum Distribution | * Pollution Control |

Geographic Markets

Mr. Weisman has provided his services to clients with sites in Texas and the surrounding states. His expertise includes work in the following geographic areas:

- | | | |
|------------|-------------|--------------|
| * Arkansas | * Louisiana | * New Mexico |
| * Oklahoma | * Texas | |

Relevant Experience

- Spill Prevention, Control and Countermeasure (SPCC) Planning;
- Prepared SARA Title III Filings;
- Environmental Site Assessments;
- Remedial System Design;
- Surface Water Collection Systems;
- Groundwater Remediation Systems;
- Soil Remediation Systems;
- Air Emission Control Systems and Permitting for 65 facilities in Texas;
- Regulatory Compliance Coordination;
- Storm Water Pollution Prevention Planning (SWPPP);
- Field Safety Training on PPE, H2S, Drug Safety, HazComm and Driving Safety.
