Present Position Responsibilities

As Compliance Coordinator & Tank Testing Business Unit Manager, Ms. Templin is responsible for the coordination, oversight, pricing, scheduling, correspondence and execution of all Tank Testing related services for EE&G. Lacey’s commitment extends to researching market regulatory compliance standards and response strategies, industry best practices and training, as well as new technologies in the storage tank testing field: Lines, Leak Detector, Stage II and other related activities. She is continually evaluating the most technically efficient and most cost effective solutions for the benefit of EE&G clients. As a Business Unit Manager, Ms. Templin is in constant dialogue with TCEQ officials and linked to industry resources in order to respond expeditiously to issues and minimize impact. In addition, Lacey is the lead Compliance Coordinator for EE&G’s Storage Tank Operations Programs (STOP) for over 300 sites with underground and above ground storage tanks, in a multi-state market area.

Expertise

Ms. Templin’s business acumen and years of expertise in logistics and regulatory compliance enables her to effectively manage a large number of client projects under diverse market conditions successfully. This is accomplished while maintaining the company’s focus on exemplary customer service, the technical expertise of our field specialists, implementation of cost effective solutions, timely scheduling and minimal disruption to client operations. Lacey’s commitment to excellence allows EE&G to provide a highly regulated service in a timely, cost effective and technically sound manner to all client companies.

Client Markets

Clients for whom Ms. Templin has provided services represent a comprehensive group of private businesses, municipalities and other public sector entities. Some of the most notable market segments in which EE&G has earned a reputation for excellence include:
